

# Assignment 2: Angrist & Evans AER 1998

Nathan Franz

3/7/2020

## Summary of Angrist's and Evans' Project

### Replication

#### Replicated Tables

Table 1: Fertility and Labor-Supply Measures, 1980 PUMS Data

Married women aged 21–35 with 2 or more children	
Mean children ever born	2.510
Percent with more than 2 children	38.060
Percent worked last year	52.820
Observations	254,654

Notes: This data includes women with two or more children except for women whose second birth was less than a year old at the time of survey.

#### Discussion

Table 2: Descriptive Statistics, 1980 PUMS Data

Married women aged 21–35 with 2 or more children	Mean (Standard Deviation)
Children ever born	2.51 (0.769)
More than 2 children	0.381 (0.486)
Boy 1st	0.514 (0.5)
Boy 2nd	0.513 (0.5)
Two boys	0.266 (0.442)
Two girls	0.239 (0.427)
Same sex	0.506 (0.5)
Twins-2	0.0083 (0.0908)
Age	30.4 (3.4)
Age at first birth	20.8 (2.9)
Worked for pay	0.528 (0.499)
Weeks worked	19 (21.9)
Hours/week	16.7 (18.3)
Labor income	6250 (10211)
Number of observations	254654

Notes: This data includes women with two or more children except for women whose second birth was less than a year old when surveyed.
